

Songs

The one and only CS-AM song

To learn to write a program
Is something we will do
To ddos and to hack them all
We know it through and through
With words like ai, block-chain, bitcoin,
And sustainability
Just speak out all these buzzwords
And the richest we will be

And then the mathematics
On which ch is based
With all our calculations
You will leave our friends amazed
We have divergence, analytics
And eliminate with gauss
We optimize our parties fast
Yes simplex is my house

The one-null-song

```
While(1)
{
    sing("one-null");
}
```
